Question 19 5 pts

Who had more than 6 trips in the list?

Sidney Wheeler

Barrett Calderon

Athena Dennis

Mariela Meyer

Please add a new column to the requests table in order to identify the distance of rides and call it Trip. Please tag rides based on the following condition:

- ☐ If the distance is larger than 20, tag it as “Long”.
- ☐ If the distance is between and including 15 and 20, tag it as “Upper Medium”.
- ☐ If the distance is between and including 10 and 14, tag it as “Medium”.
- ☐ If the distance is between and including 5 and 9, tag it as “Lower Medium”.
- ☐ If the distance is less than 5 tag it as “Short”.
- ☐ if no information is available for distance, please tag it as “No Information”

Please remove the column that you added recently (Trip).

List once each car model cars that was requested on Tuesday. Try this with the EXIST operator.

Question 20 5 pts

How many rows are returned?
